

Preface

We are proud to present the Proceedings of ATCM 2007, held this year in Taipei, Taiwan. All contributed papers are reviewed by peers. The Electronic Proceedings of ATCM 2007 (EPATCM07), which include all refereed full papers and abstracts presented during the conference, will be available at <http://atcm.mathandtech.org> no later than February 1, 2008.

The theme of this year is “Making Mathematics Fun, Accessible and Challenging through Technology”, which becomes possible thanks to evolving advanced technological tools. We are excited to see that ATCM 2007 contributors had written many wonderful papers in the areas such as Mathematical Research with Technology, Mathematics Education Research with Technology, and Applications of Calculators in Mathematics.

ATCM 2007 is extremely fortunate to have wonderful and unrelenting support from the International Program Committee members and external reviewers who have made the Conference Proceedings possible. We selected 25 contributed papers. In addition, we approved 42 submissions for the Talk with Abstracts Only, 21 submissions for the Hands-on Workshops, and 5 submissions for the Poster Session. We are equally thankful to have seven plenary speeches and six invited speeches. We invite all contributors to consider submitting their work at ATCM 2007 to be considered for publication in the Electronic Journal of Mathematics and Technology (eJMT: <https://php.radford.edu/~ejmt>).

We sincerely thank our sponsor, CASIO, for making the Proceedings of ATCM 2007 possible.

Editorial Board of ATCM 2007
