The Electronic Journal of Mathematics & Technology

ISSN 1933-2823
<http://ejmt.MathAndTech.org>

Why eJMT?

- The eJMT, an *international refereed journal*, will address technology-based issues in all Mathematical Sciences.
- The eJMT deals primarily, but not exclusively, with the *use of technologies in mathematics and mathematics education research, pedagogy, and mathematics applications*.
- The eJMT communicates the most recent *applications of technology* in pure and applied mathematics and in electronic format, *including video and sound*
- The eJMT publishes the *source codes of programs* together with submitted paper electronically, so readers can actually continue the experiments.
- The journal is also a valuable medium for *high school mathematics teachers worldwide* to discuss effective ways of implementing technology in their teaching.

The eJMT has four basic areas of interest:

Trend 1: Research in Mathematics and its Applications and Mathematics Education with Technology

Trend 2: Instruction in Mathematics and its Applications with Technology

Trend 3: Learning in Mathematics and its Applications and Mathematics Education with Technology

Trend 4: Newly Emerging Technologies and Mathematical Fields

Editorial Board: Complete list of editorial members can be found at the URL:
<http://ejmt.MathAndTech.org>.

Editor-in-Chief
Wei-Chi Yang, Radford
University (USA)
e-mail: wyang@radford.edu

Executive Editors
Keng Cheng Ang,
NIE/Nanyang Technological
University (Singapore)
Matthias Kawski,
Arizona State University (USA)
Mirek Majewski
New York Institute of Technology
(UAE).

Managing Editor
Stephen Corwin, Radford
University (USA)

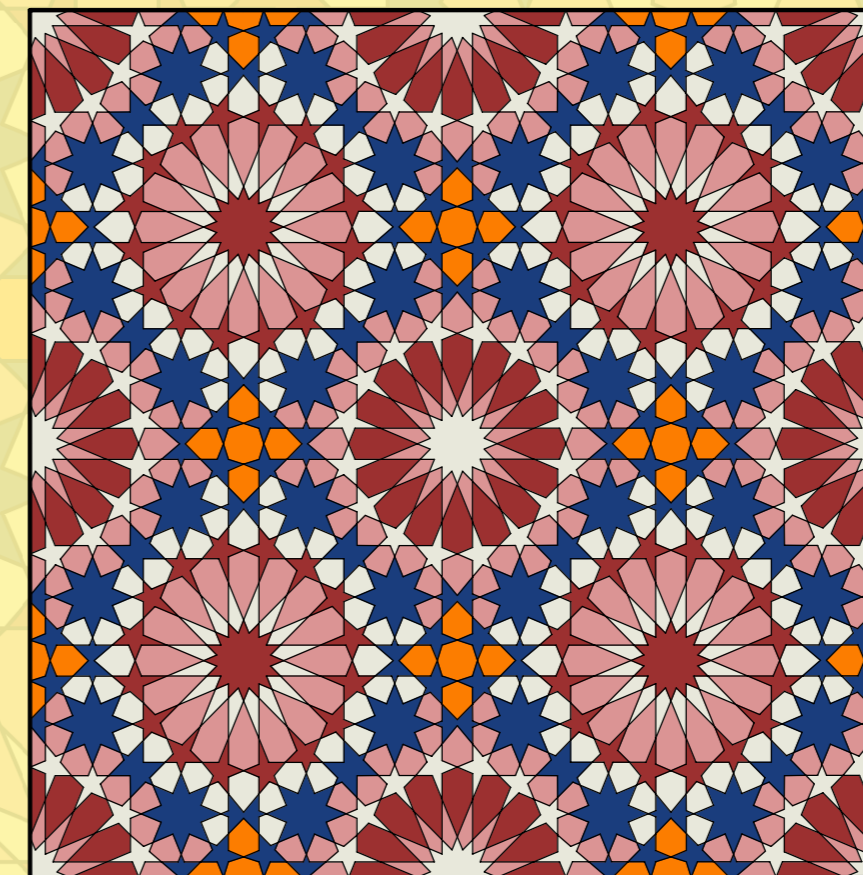

Annual Subscription Fees: Institutions: US\$300. Individuals: US\$100. For more information, please contact us at ejmt@mathandtech.org
